Quick Start Guide

1 Package Contents

Unpack the package and inspect the items closely to make sure no item is damaged. The package should include:

- 1 Scanner
- 2 USB Cable
- 3 Power Adapter
- 4 Installation CD
- 5 Quick Start Guide

2 Installing Driver

Windows

NOTE: Please complete the software installation before connecting the scanner. Do not connect USB cable to the scanner or PC at this stage.

1. Insert the software Installation CD into your CD- or DVD-ROM drive. The CD will run automatically, and then a main menu will pop-up on the screen.

Note: If the Autorun does not work, click on "AUTORUN.exe" file.

2. Select "**Scanner Driver**" from the main menu.

Note: The Panel V2.0 will be installed with the Scanner Driver.

3. Follow on screen instructions to complete the installation procedures.

4. InstallShield Wizard will remind you when the software installation is complete.

Note: Return to the main menu to install other software to your computer to enable certain features.

Mac

1. Insert the software Installation CD into your CD- or DVD-ROM drive. Double click icon on the desktop.
2. Double click **Image Acquire** folder, and then ImageAcquire icon. Follow on screen instructions to complete the installation procedures.
3. Double click **Scanner driver** folder, and then the scanner model icon. Follow on screen instructions to complete the installation procedures.

3 Installing Hardware

1. Connect one end of supplied power adapter to the scanner's DC IN jack, and the other end to a power socket.
2. With the computer being turned on, connect one end of the USB cable to the USB port of your computer and the other end to the scanner.

Note: Two pop-ups will appear at the right side of task bar after the computer detects the new hardware being inserted. The Windows Hardware Manager will detect the hardware and remind you to start to install it. Follow on screen instructions to complete installation. The pop-up message will appear at the right side of task bar when the hardware installation is complete.

4 Placing an item for scanning

1. Open the scanner cover. Place the item facing down on the flatbed glass.
2. Position the paper as indicated by the position arrow mark. Close the scanner cover.

Note: The hinges of the scanner lid can extend upwards to accommodate thick items.

5 Turning on the power

Press the **POWER** button to turn on the scanner. The power LED lights up in blue.

Note: Press and hold for 3 seconds to turn off.

Note: The scanner will turn off after 15 minutes if no operation.

7 Scanning

Windows

You can scan in three ways with the Scanner, namely via the scanner's **SCAN** button, on-screen Panel V2.0 or via the TWAIN panel.

The easiest way to make a quick scan is via the scanner's SCAN button:

Press the **SCAN** button on the scanner, the status and progress bar will show scanning progress. Upon completion, the scanned image will be saved in your computer and displayed in the Panel V2.0 or the default viewer program.

To scan with the Panel V2.0, do following:

1. Press the **PANEL** button on the scanner to launch the Panel V2.0 software.
2. Press the **Scan** button to start scanning.
3. Press the **Save** button to save the scanned image.

To scan with TWAIN Dialog box, do following:

1. Launch the TWAIN-compliant program (e.g. Arcsoft Media Impression, Photoshop)
2. Under the Import menu, select the Acquire command and choose the A3F2400N Scanner.
3. Click Acquire. The TWAIN dialog box appears.
4. Click **Preview** to prescan. Set the scan area using the marquee, then click **Scan**.
5. Click **Save** to save the scanned image.

Mac

1. Double click icon from Mac's 'Applications' folder. Choose the A3F2400N Scanner from the Image Acquire window, then click Acquire.
2. Click **Preview** to prescan. Set the scan area using the marquee, then click **Scan**.
3. Click **Save** to save the scanned image.

8 Using the Scanner Buttons (Windows only)

Note: These scanner buttons work only with the Windows computers.

The scanner's buttons allow you to perform a quick scanning in an easy way.

1 SCAN button

Scans directly to the default viewer program, and the scanned image will be saved in the computer.

2 PDF button

Scans and converts the scanned image directly to a PDF file, and the scanned image will be saved in the computer.

Note: To convert to a searchable PDF, you must install the ABBYY FineReader and the Adobe Acrobat Reader from the installation CD.

3 PANEL button

Opens the Panel V2.0 to access additional features including Edit, OCR, Settings and etc.

Note: To perform OCR text recognition on scanned documents, you must install the ABBYY FineReader from the installation CD. For more details about the Scanner Panel, press the Help button on the Panel V2.0, or press Start > All Programs > A3F2400N Scanner > Help > Software file to find more details of the functions.
